(54) Title: METHOD OF PERFORMING A PANORAMIC DEMONSTRATION OF LIQUID CRYSTAL PANEL IMAGE SIMULATION IN VIEW OF OBSERVER'S VIEWING ANGLE

(57) Abstract: The present invention discloses a method for displaying the result of the image simulation predicting color tone, contrast and brightness of image shown as a viewing angle of observer. The invention includes steps that perform transformation of coordinates on the basis of a viewing angle of observer and projection of image generating new image in perspective. As a result, the result of the image simulation can be shown and analyzable with reality. Moreover, the invention affords convenience in the analysis of the result of image simulation.
